WORK EXPERIENCE

College of William & Mary

Programmer/Analyst

Apr. 2022 – May 2026

On site (Williamsburg VA) / Remote

- The College of William and Mary is the Second Oldest College in the country which serves roughly 10,000 active students and roughly 4,000 active faculty, staff, and researchers.
- Troubleshooting existing scripts and integration as well as developing new programs as needed by the university to meet student, faculty, and research needs. Worked heavily in both Banner and Workday ERP environments.
- Work directly with customers and external vendors to gather requirements and to create integration specification documents to develop and test new integrations.
- Developed integrations that send and receive sensitive data from third party vendors we contract.
- Developed scripts to automate common tasks for various departments across the university.
- Developed efficient report queries for various departmental or research needs.
- Developed Webpages used by students to gather and display personal and safety information
 - **Stack:** Oracle SQL, PostgreSQL, Java, Python, SQL, HTML/CSS, Javascript, Shell Script

IT Curves

Software Engineer (Full Stack)

May 2021 – Apr. 2022

Gaithersburg MD

- IT Curves is a company that develops software for transportation organizations and public transit.
- Software Engineer responsible for creating demos and web UIs for new and existing products.
- Worked with customers to gather requirements for desired changes to the current software UI
- Developed standalone plugins for apps that our partners use (location plugin for app created in Android)
- Developed Standalone graphical displays for our partners (“Where is my Ride” Display for health centers)
 - **Stack:** C/C++, C#, HTML/CSS, Javascript, MSSQL, Python
